Quality Bread

There is a peculiar something about Browning's Bread that makes it Stand Out Prominently in many homes in this town—it has a Tastiness that causes the children and grown ups to marvel at its Goodness. The answer is, Quality, and that is because the best wheat and other ingredients of the highest nutrition, combined with Modern Methods of Baking go into every loaf. We serve quite a number of citizens daily, and we can serve you too. Buy a loaf of Our Bread today and you will appreciate this

A. E. BROWNING
BAKER

MAIN STREET --- BOW ISLAND

BOW ISLAND

Mrs. G.B. Mitchell of Bow Island and little grandson Leonard went to Virden, Manitoba to accompany her mother Mrs. T. Palmer to her home at Virden, she not being able to stay in Alberta for ill health.

Mrs. R.A. MacDonald held a very enjoyable dance in the barn, last Monday evening the 9th, most of the neighbors attended, amongst the number we noticed Mrs. Proudfoot and J.W. Proudfoot, Mrs. M. McKenzie, Mrs. John Miller, Mr. Alfred Miller, Mr. O. and Mr. R. Calder, with their daughters and many others too numerous to mention, all report a very enjoyable time, much dancing was indulged in, also some Gaelic songs were given by the hostess.

Mrs. MacDonald hopes to have another dance before long.

Mr. A.E. Tunstall returned last Thursday from a motor trip to Calgary then north to Wetaskiwin and Camrose and other points. Mr. Tunstall says that the Crows are not looking any better than they are around Bow Island and district in fact not so good in some parts, but reports that the week he spent in meeting around at different points was delightful the roads being good, and plenty of bush, lakes and rivers, that was the life.

Mr. J.M. Hall harvest and stacked 140 acres of flax, which is estimated to be the best in the country, undoubtedly it is a held of a wonderful crop, it sure looks good.

Victor Thompson and Leona Duffy motored to Medicine Hat last Sunday.

One nice thing after another, first having one's garden blown out three times this year and with strenuous labour got it to look its best and a large patch of sweet corn to pull and nothing better could come along one night than 30 or 40 head of cattle and got into garden; oh boy! what a grand and glorious feeling.

Neglected Children

From our own Correspondent

John Kessler was summoned in the above case last Friday the 6th, inst. before H.P. Burrell, Police Magistrate, information was laid in the case by A.B. Brooks, Inspector of Neglected and Dependant Children, all the children of the accused were in court. The charge read as follows: that John Kessler did between July 9th 1920 and the fifth day of August 1920 at his residence in Section 24 of the said Province did cause Katie, Pete, Louis, Eva and Tomie Kessler his children to be neglected contrary to Sec. 17, Chap. 12 of the Province of Alberta, the accused pleaded not guilty.

Olga Kessler age 16 years sworn 1 live with my father on the farm near Winnifred, my brother and sisters names mentioned above, together with Mrs. Schlachter, who has been here between 2 and 3 years, she stated that her father went away with Mrs. Schlachter to Medicine Hat last July 9th, 1920 and was away four weeks, the accused returned home Saturday August 7th, 1920 bringing with him Mrs. Schlachter and her child, she stated that her father left about three lbs. of flour and three loaves of bread in the house when he went away, no meat or butter, there was three lbs. of lard and one lb. of coffee and about two lbs. of sugar and one lb. of rice, he did not leave any money with me to buy more food, he told me to go to Winnifred and get some money from Mr. Keller and get some flour, the results were that the U.F.A. held a meeting so that they could arrange to give the supply of food, my father did not write me until about two weeks after he left, she also stated that she had plowed all the land and hauled all the water for the stock (for over two miles) and said that our home is not a fit place for the children on account of that woman living there, after hearing the evidence, his Worship said there was no doubt but that these children were neglected within the meaning of the Act.

And they were under Wards of the Department. His Worship also reserved Judgement in regard to the accused until a later date; Mrs. Brooks was engaged by Mr. Brooks as Matron and escorted these children in company with Mr. Brooks to the Medicine Hat Children's Home last Monday evening.

Allies Acting**A Dastard's Part.**

How it does make real men with red blood in their veins, writhe with sickening disgust when they read how the Allies are going through a programme of political juggling tricks and viewing each other with hearts aching with jealousy of each other, in case one should have a scrap more than their neighbour.

And all the time they are spending in trying useless bluffs and empty political threats, to brave little nation, Poland, is being slowly done to death by her enemies in the sight of the whole world and there seems not one notion with enough Pluck and Civilization in them, to go to the aid of the weaker against the stronger.

The Allies seem fatally afraid of the Bolsheviks but the Day seems coming that if the Allies are too cowardly to go after the Bolsheviks, then after them the Bolsheviks will come after them.

C. P. R.

One is continually reading of Fatalities at Railway Crossings, caused by C.P.R. and other Railway Engines often in broad daylight crashing into Motor Cars, Trucks, Wagons, and everything, anything and everything indiscriminately, as though the Railways alone have the Sole Rights to this Earth.

They are only Man-made Corporations, therefore they should be held equally responsible to Man-made Laws and made to obey those Laws and not show a reckless disregard for Human Life and other peoples' property.

We maintain that an Engineer of any kind of Train should be compelled to stop when Life and property is in danger.

Through Political Juggling some years back, the Railways obtained from the Government, land which should have been given to the people, therefore the Railways should take double precautions not to kill the people after taking their lands.

Every Railway Crossing should be fitted with a special "Safety Device" as a Semaphore by Day and bright Lights at

night to show the approach of Trains to the Public and also warn the Engineer of the approach of Public Traffic, which has as much or even more right than the Train to proceed on its business, unmolested by the danger of being killed by the engines of any soulless Railway Corporations.

Sudden Death

Last Wednesday morning, near Hightfield School-house, a farmer named Degenstein found a car turned over on the road and underneath was Herbert S. Bagnall, who was quite dead.

Mr. Degenstein then rode over to Mr. Elford's on sec. 14-11 about 16 miles north of Foremost and Mr. Elford, Dr. Astorff and Mr. Hurst, the undertaker went to the scene of the accident at Sec. 8-11; the body was moved to Mr. Elford's house and later on was brought to Bow Island by Mr. Hurst who received a Warrant from Coroner Humphries to take charge of the body and instructed Constable Bradner to take charge of all the property and hold same for the relatives.

The car went off the grade and turned turtle and was badly smashed up.

At the request of the Elders of the Baptist Church, Mr. Johnson, undertaker of Medicine Hat came up to Bow Island on Thursday morning up to the body to Medicine Hat.

Rev. E.C. Bagnall was a Baptist minister of Medicine Hat and was touring around as the Official Organizer for the Prohibition Campaign for this Division.

His wife Mrs. Bagnall, who is visiting between Nelson B.C. and here, has as yet no knowledge of the accident, and is expected back home at Medicine Hat this Friday morning.

Bandit Captured

The murderer-bandit, Tom Bassoff was captured about 10:30 last Wednesday night close to Pincher in an empty shack near the Railway-track.

The Engineer, of the Pusher Engine running from Pincher to Burmis, is a fine example of alertness, at 10:15 p.m. saw the head-light of his engine show up the figure of a man walking on the railway-track several hundred feet ahead, as soon as the man found the head-light shining on him, he jumped into the ditch and made off in the darkness.

The Engineer speeded into Burmis and at once told the police, and the police who had been keyed up to swift action, were rushed back and promptly nailed the murderer bandit, who exhausted and hungry, put up no non-fight.

This Tom Bassoff shot and killed two policemen, Corporal Usher and Constable Baillie, after holding up the C.P.R. passenger train near Sentinel.

The third Bandit is still at large.

Farmers

We have Farmers asking about Rye.
We would be glad to hear from any Farmers who have a Rye Crop, as to the best methods of Cultivation and yield of bushels per acre to an ordinary crop of Rye.

All information will be printed for the benefit of those Farmers who as yet have not raised a Rye Crop.

The Ladies in the Lead

We have been spoken to by many people in enthusiastic terms of the fine Papers given by Ladies: one Paper by Mrs. Bagnall, on "Women's part in Political Life" and another Paper by Mrs. S.C. Sorenson on "Education," both the Papers appeared recently in the Review, and the Public have endorsed those Papers as being of a high order, showing deep thinking and reasoning, they are the Standard bearers of Hope, Happiness, and a higher Mentality for all.

We would indeed be pleased to have similar Papers every week from the Ladies or Gentlemen, as our readers are greatly interested in them.

The Weather August 1920

Friday 6th. Bright sunshine, hot.
Saturday 7th. Hot all day.
Sunday 8th. Sunny and hot.
Monday 9th. Cloudy and cool.
Tuesday 10th. Spots of Sunshine and Clouds, windy.

Wednesday 11th. Cloudy and windy.
Thursday 12th. Hot.

Winnifred

Mrs. McKee returned last Tuesday from Medicine Hat with her little daughter just for a short time as she is leaving Winnifred for Saskatoon where she will make her future home. Mrs. McKee her husband is there at the present time but will be back for his wife very soon, they are anticipating making the trip by car. Mrs. McKee will most certainly find a find a great change at Saskatoon in a large city, her friends wish her good luck.

Wheat cutting is the order of the day, all the Farmers are very busy with binders and headers going in all directions, reports are that the wheat is yielding very good in some places.

Saskatchewan Harvest Commences August 15

REGINA, Aug. 9th.—Wheat cutting will start in some districts of Southern Saskatchewan this week and will be general after August 15, according to a report issued here today by Grand Trunk Pacific officials. An average crop of 18 bushels to the acre is reported from Eldorado district in the Qu'Appelle Valley.

Three Men Are Killed And Thirteen Injured In Street Car Rioting

DENVER, August 7.—Three men were killed and thirteen injured when rioting was resumed by striking street car men and their sympathizers at the East Side car barns. The dead men are: Dan Sullivan, 35 years old; Dan Flannigan and Charles Hansen, all of Denver.

No Communion for Women in Attire that is Immodest

CARLIPP, Wales, Aug. 8.—Against a British clergyman, has put his foot down against the prevailing fashions in women's dress and refused to give communion to all women who kneel at the altar rail in attire which he may regard as immodest.

Father Joseph Paulin, celebrant of High Mass at Saint Paul's Roman Catholic Church here, issued the following warning to his congregation: "I hope," he said, "that lady members of my parish will not attempt to attire themselves in some of the present day fashions. If any immodest dressed woman approach the altar for Holy Communion I shall refuse to allow her to partake of the Sacrament, passing her by as if she did not exist."

Disastrous Fire Occurs at Lanfine**New Bank of Toronto and Hardware Store are Totally Destroyed**

LANFINE, Alta., Aug. 9.—The little town of Lanfine, half way between Calgary and Saskatoon on the Grouse Lake line of the Canadian National Railways, was the scene of a very disastrous fire, beginning about 8:30 p.m. Saturday, and the new Bank of Toronto and Bailey's hardware were totally destroyed, saving nothing. Fire spread so rapidly on account of burning oil and gasoline that it was only through hard work and the assistance of a passing freight train with a water car that the balance of the town was saved from loss.

Explosions of gasoline drums shot the steel barrel high into the air, some landing in nearby fields. The fire originated in or near the oil warehouses.

A Big Western Problem

It is, of course, merely a trite observation, and a statement of what everybody knows, to declare that the Western Prairie Provinces of Canada have many difficult problems to solve in order to promote their maximum growth in population, wealth and general development. Neither time nor space would permit of even a mere recapitulation of these various and complex problems, not to speak of an intelligent consideration of even a few of them.

Asked to name the first and foremost question demanding attention by the people of the West, would no doubt, be varied and as varied as interesting. Some would say a larger population in order to develop the country, increase their production, and assist to bear the expense of the public services. Others would urge full provincial control of the natural resources in order that they might be developed for use. Others would say that they would emphasize upon the assimilation of the foreign-born into a broad and true Canadian citizenship. Better schools and a more general education for all classes would be advocated. Some would say tariff reform, or cheaper money, were the main external factors to a betterment of conditions; while others, again, would say stress upon social, moral and religious factors. Some practical minds would say more branch lines of railways, better roads, and a general improvement in all means of transportation. And to a greater or lesser degree all these things are necessary to the welfare, growth and prosperity of the Prairie Provinces. There can be no question about that. But at the present time there looms up a problem, the solution of which would first appear to be necessary without loss of time if many of these other questions are to be satisfactorily settled. And in some respects it is the most difficult of all our problems.

We refer to the need of solving the difficulties, we might almost say the disastrous conditions, confronting thousands of settlers by reason of the drought which has afflicted sections of the West during the last two years. So long as these conditions continue a black eye is given to immigration to this country because the best advertisement thus given western Canada abroad has an adverse effect on the securing of that larger population we need and must have. It affects the credit of our people, stops railway development, cripples business and imposes heavy burdens upon municipalities and governments. Something better than the provision of temporary relief to the direct sufferers must be found.

Those who are perhaps best qualified to judge, believe the only solution is to be found in a radical change in farming methods in this district, and the substitution of other crops, in part at least, for the all grain crops

which have, for the most part, been attempted in the past. It is asserted that even in these drought afflicted areas, a few farmers have been able to succeed, where the majority have failed, by reason of the fact that they followed other methods.

In the years of drought, there was not only failure of grain crops, but also of grass, with the result that there was neither food for man nor feed for stock. On the other hand, some farmers were successful even in these years of lack of moisture, by raising green corn and other kinds of feed for stock when even the grasses failed. What they succeeded in doing, they have not yet been able to do.

It is suggested, therefore, and wisely it would seem, that steps should be taken to bring the actual experience of these men, and the methods followed by them, to the knowledge of the people generally in the districts referred to, not by books or pamphlets, but by those men telling the story of their experiences and success to groups of farmers throughout these districts.

It is also being urged that the combined knowledge of the agricultural expert of the country should be brought to bear in an effort to solve this problem.

These experts and scientific agricultural men, who are scattered all over the country, have evolved earlier ripening varieties of grain in order to escape the loss occasioned by frosts. Along this line they have met with splendid success and the loss from frost, which formerly was a constant dread of the farmer, has been enormously decreased. Has the time not arrived when the energies of all these men should be directed to the study of the best variety to evolve a drought-resisting variety of wheat and other grains?

There are countries even more seriously affected with drought than western Canada, which, nevertheless, are succeeding agriculturally. Surely from these the chance of endeavoring to evolve a drought-resisting variety of wheat and other grains?

Something must be done, and done soon, to create new conditions in the areas referred to, or else they will be abandoned as unfitted for agricultural settlement, with all that will mean, not only to individual loss to the people there, but to the whole country. It is impossible to go on, hoping against hope that "next year" will yield a crop, and in the event of disappointment reliance upon the government for food, fuel, clothing and next season's seed, and the removal of stock to greater pastures. The country has about reached the end of this unsatisfactory policy; something more permanent, more constructive, that will put new hope into men's hearts, must be forthcoming.

Old Gardens New When Diamond Dyed

Shabby, Faded, Old Apparel Turns Fresh and Colorful

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods, - dresses, blouses, stockings, skirts, children's coats, leathers, draperies, coverings - everything.

The Direction Book with each package tells how to Diamond Dyed any color.

To match any material, have dealer show you "Diamond Dyed" Color Card.

Completing Hudson Bay Line

The Winnipeg board of trade has been notified by the federal government that it will cost \$400,000 to complete the Hudson Bay Railway. Up to the present, 332 miles of the line have been built and about 90 miles of track are still required to bring the road to its ocean terminus at Port Nelson. The Dominion government is not yet in a position to say how much money it will be able to devote to the Bay line this year. The West is pressing for completion.

One Trial of Grape-Nuts

will do more than many words to convince you of the goodness of this wheat and barley food.

But it's worth saying that Grape-Nuts contains all the nutriment of the grains, is ready to eat, requires no sugar and there's no waste.

Grape-Nuts is a Builder

Our Senses Are Untrustworthy

Scientific Development Is Making Rapid Strides in These Modern Days

Though many disagree with the views held by Sir Oliver Lodge as to the life to come, few will challenge his right to be numbered among the select few who have changed radically the views educated men hold as to the physical side of the universe. Nothing he cares to say as to electronic matter, the ether, is worthy of attention, and must furnish food for reflection. A few days since, in the course of a lecture to an audience which filled the capacious Carnegie Hall in New York, he said, carrying a small wooden table: "This appears to be solid," and waving his arm in the air, "This appears to be empty; it is exactly opposite. You may not believe it, but it is true."

Such men as Soddy, Rutherford, John Cox, Thomson, and many other physicists tell us that senses, calculated but to serve certain vital uses, deceive us in everything which does not touch on the daily needs of physical existence. They speak with certainty on the electrical basis of matter; tell of a mysterious ether, which permeates all yet is imperceptible to our senses; they show that our notions of such things as heat, light and sound are founded on hypothesis that are fundamentally false and hence misleading, until the layman finds his head reeling and his confidence in the knowledge he had acquired as a lad slipping away.

The discovery of radium has strengthened the standing of geology, because it permits of a vastly extended time-scale. The earth is no longer regarded as a world gradually growing cooler. It has in its known store of radium a source of heat which, at last, not for a mere million years, but probably for tens of thousands of millions years. It is possible that the danger to the planet will come from too high an internal temperature, rather than from one too low. In other words, the world is not a vast cold body, as our forefathers believed. But as such a catastrophe is not hardly possible sooner than about a million years this need not cause any particular uneasiness to the present earth folk.

The subject is much too vast for more than mention, and those who are sufficiently interested should read what has been written on it by the men of science named in the foregoing - there is quite a voluminous literature to be consulted. But, very recently, and under surprise has been sprung, quite as significant as any previous theory of the ether, electrons and matter, and of this there is as yet little to be learned from books, in the last-born of science, - Winifred Free Press.

Every child - whether it be poor or rich is entitled to joy and gladness. It is the birthright of every child, and there is absolutely no doubt that the healthy baby is a happy baby. It is the baby that is healthy that is the happy baby. The only sickly baby is cross. The well child is a joy to the mother. It is a laughing, giggling, happy little ball of humanity which drives the care from the household. The sickly baby is the opposite - he is cross and peevish, cries a great deal and is a source of constant worry to the mother. But mothers there is no need of your little ones being sickly. Regulate the baby's bowels and sweeten his stomach with a gentle but thorough laxative and baby will soon be well and happy again. Thousands of mothers have proved this through their use of Baby's Own Tablets - there is a smile in every dose of the Tablets. Give them to your baby and make him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont.

JOY AND GLADNESS FOR THE CHILDREN

Every child - whether it be poor or rich is entitled to joy and gladness. It is the birthright of every child, and there is absolutely no doubt that the healthy baby is a happy baby. What they succeeded in doing, they have not yet been able to do.

It is suggested, therefore, and wisely it would seem, that steps should be taken to bring the actual experience of these men, and the methods followed by them, to the knowledge of the people generally in the districts referred to, not by books or pamphlets, but by those men telling the story of their experiences and success to groups of farmers throughout these districts.

It is also being urged that the combined knowledge of the agricultural expert of the country should be brought to bear in an effort to solve this problem.

These experts and scientific agricultural men, who are scattered all over the country, have evolved earlier ripening varieties of grain in order to escape the loss occasioned by frosts. Along this line they have met with splendid success and the loss from frost, which formerly was a constant dread of the farmer, has been enormously decreased. Has the time not arrived when the energies of all these men should be directed to the study of the best variety to evolve a drought-resisting variety of wheat and other grains?

Something must be done, and done soon, to create new conditions in the areas referred to, or else they will be abandoned as unfitted for agricultural settlement, with all that will mean, not only to individual loss to the people there, but to the whole country. It is impossible to go on, hoping against hope that "next year" will yield a crop, and in the event of disappointment reliance upon the government for food, fuel, clothing and next season's seed, and the removal of stock to greater pastures. The country has about reached the end of this unsatisfactory policy; something more permanent, more constructive, that will put new hope into men's hearts, must be forthcoming.

HEAVY WORK

Your horse will heavy made over all kinds of roads - make their work easy - save your harness and wagon.

Imperial Mica Axle Grease prevents friction in the hub. As the mica flakes work into the pores of the axle and hub, the rough surfaces are smoothed with a hard filling of mica. The grease on the flange surface insures thorough lubrication. Sold in sizes from a one pound tin to a barrel.

Imperial Eureka Harness Oil makes leather strong, pliable and waterproof. Prevents cracking and breaking of stitches - cannot be rubbed off. Makes a rich black, lasting finish.

Sold in pint, quart, half-gallon, gallon and four-gallon sealed cans, half-barrels and barrels.

Exchange Situation Impetus for Settlers

Americans Taking Good Advantage Of Rate of Exchange in Buying Farms

One of the results of the present high Canadian exchange has been made apparent during the last few weeks. Americans intending to settle in Western Canada are buying the United States sooner than they planned and in much larger numbers than was expected. The exchange situation has proved a stimulant to American settlement in Western Canada, because the settlers find they can gain from \$125 to \$4 an acre in purchasing land. Many Americans who had purchased farms when exchange was normal, and had money in the banks, have taken advantage of the low quotation of Canada's money, and cleared off their deferred payments, making a large saving.

Americans of means are paying cash for their farms. With the rate of exchange as it is today, the saving on a quarter-section of land at \$35 an acre is about \$840, which is quite an item on a \$5,000 transaction, while the steady money thus put into circulation is having a beneficial effect throughout the west, both on investments and general trade.

Predicts Rush Into Peace River Area

Oil Fields Greatest in World Says Lieut.-Col. J. K. Cornwall

Ottawa - The summer of 1920 promises to see the greatest rush into the Peace River country that has ever been seen in any section of Canada, is the prediction of Lieut.-Col. J. K. Cornwall, who is here conferring with government departments in connection with matters of interest to the north country. "Col. Cornwall, probably the best known figure in Peace River, and a trapper and trader of 25 years' activities in the north, has been talking the fur industry of Peace River on a new high pedestal. "Watch the Peace River this year," said the enthusiastic Colonel, "will there be oil discovered? - Certainly expect so. As a matter of fact, my opinion is that the year 1920 will see the opening in that north country of the greatest oil fields in the world. Texas, in my view, will virtually fade away in comparison with the result that this fall and early spring the Peace River country will be in the throes of an oil stampede into the north that has had no precedent in this continent."

BAR U AND NAMAKA FARM PERCHERONS

The largest stock of the Purebred Percherons in the World. The two best breeding farms established in Canada. The only farm in the American continent from which British breeders have selected Percheron breeding stock to establish in Britain.

Do not let the British breeders come to Canada and carry off all our best foundation stock. Do not be satisfied with the cheap old stallions brought in by irresponsible dealers and who come from the United States. Buy from the best individuals of the best breeding farms right here in Alberta by those who have been in the breeding business for 25 years. The stock is reliable and the horses are on hand to be seen. You can see them at any time and if you wish to buy them for sale or lease, or to have them bred, you can do so. Write to us for prices or come to Calgary, Alberta, and we will meet you and show you the stock as you wish.

GEORGE LANE (Desk B), CALGARY, ALBERTA

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes has been the Percheron. The greatest breed of draft horses in North America are Percherons. The safest investment in draft horses today is Percherons. A profit to own—a pleasure to handle. You will make no mistake in your horse breeding this year if you use a Percheron sire.

FOWLER'S CIDERS

Fowler's Ciders are a refreshing and healthful beverage. They are made from the finest apples and are brewed in the most sanitary manner. They are a refreshing and healthful beverage. They are made from the finest apples and are brewed in the most sanitary manner.

She Wears Nothing Faded and Shabby

But "Diamond Dyes" Her Old Apparel Fresh and New

Don't worry about perfect results. Use "Diamond Dyes," guarantee to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything.

The Direction Book with each package tells how to Diamond Dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

A Different Matter

Countryman (to dentist): "I won't pay anything extra for gold. Just want her out, if it does hurt."

Dentist: "You are plucky, sir, let me see the tooth."

Countryman: "Oh, 'tain't wise 'n't that, give the toothache, 'n' let 'em see. She'll be here in a minute."

Pluck loses no time on account of hard luck.

For Colds, Catarrh or Influenza

Island in Hudson Bay On Which There is 400,000,000 Tons

Samuel Sainsbury and E. E. Ladouce claim to have located an island in Hudson Bay on which there is 400,000,000 tons of iron ore in sight, enough to supply Canada for a century, as one of the discoverers said. The men have gone to the discovery point and on railway flat cars took four fat-bottomed barges, 45-foot-long open barges, specially constructed to stand heavy seas, and two smaller tugs. In addition they had a cargo of provisions which represents a two years' supply.

They made the discovery in Belcher's Island, on the east coast of Hudson Bay, and in Quebec. This land, they claim, is improperly shown on the maps. It is really much longer than it is wide, being seventy miles long, with a fresh water lake thirty miles in length. The pair also claim that nearby islands have huge deposits of iron ore.

Ontario's New Election Act

Hon. E. C. Dwyer, Justice Minister of Ontario, has introduced a new Election Act in the Legislature by which the Province will in the future cease to be a party to the election of the House of Commons.

This land, they claim, is improperly shown on the maps. It is really much longer than it is wide, being seventy miles long, with a fresh water lake thirty miles in length. The pair also claim that nearby islands have huge deposits of iron ore.

Demand for Good Horses

Sires At This Season Are A Community Need

You should co-operate with your neighbors in order that some good sires may be brought in by private parties, or leased before the breeding season opens. Because of the war, the demand for good horses is increasing in all classes.

1. The demand and price for good horses and mules is increasing in all classes.

2. There is a shortage of good horses and mules of all kinds.

3. Farm demand is improving.

4. There is a shortage of good horses and mules of all kinds.

5. City trade is improving, because transportation users of all kinds have discovered after years of experience that horses furnish the cheapest of all sources of power on short hauls.

On this Harry Vickers, president of the Fuel Cartage Company of Chicago, says:

"There is a work today that the horse cannot do—long distance hauling with rapid transportation—but the motor cannot take the place of the horse, because the horse can do the work on short hauls just as rapidly and at a lessened cost of 25 to 40 cents on the dollar, consequently we never allow a truck to displace a team. We will buy a truck to do the work that a horse cannot do, but we don't see a truck to do the work that a horse can do. It would be like having a dollar and throwing away 40 cents."

Of the farm demand, W. C. Cora says: "Farmers are determined bidders in country sales and prices for good horses have gone up 25 to 50 per cent. The last thirty days, while mules are bringing from \$800 to \$1,000 a pair."

Of the horse demand, W. C. Cora says: "Farmers are determined bidders in country sales and prices for good horses have gone up 25 to 50 per cent. The last thirty days, while mules are bringing from \$800 to \$1,000 a pair."

For Decreasing Armaments

Benefit Relationship Between U. S. and Britain By Disarming

Discussing the American presidential situation and its possible effect on the relationship between Great Britain and the United States, the London Daily News, under the caption "Disarmament and Arms," relates the reaction from war in the United States.

"Rightly or wrongly," the newspaper says, "America revolted against the treaty her representatives had to help to draft, and under the influence of that emotion resolved not merely to maintain her detachment from Europe, but to arm herself potentially against Europe."

"Nothing will bring the two hemispheres together more rapidly than a demonstration from this side of the Atlantic of sincere resolution to disarm. Nothing could be more beneficial to Anglo-American relations than an invitation, extended more than once, by Walter Hume Long, speaking officially as first lord of the admiralty, for completion with America, not to increase armaments, but to decrease them."

"The fact is that the war was a demonstration from this side of the Atlantic of sincere resolution to disarm. Nothing could be more beneficial to Anglo-American relations than an invitation, extended more than once, by Walter Hume Long, speaking officially as first lord of the admiralty, for completion with America, not to increase armaments, but to decrease them."

WESTFIELD

From our own Correspondent

Mr. and Mrs. T. Marino and son
George returned home after their
visit to Idaho and still admit an
appetite for fruit.

Mrs. Mabel Anderson from Burdett,
was a week end visitor to Westfield.

Mrs. Shearer of Redcliff returned
to her home after visiting her son
Mr. J.B. Shearer, her granddaughter
Isabel, has gone with her.

Mrs. Maria Elford has continued
her trip to Seattle, spending a week
end in Vancouver she is accompanied
by her sister Mrs. Elliot, who is on
her way to California for the winter.
Mr. and Mrs. S.T. Elford, and Mr.
and Mrs. F.R. Elford went with
them as far as Lethbridge returning
on Thursday evening.

H. Gross has returned from Grassy
Lake where he has been working for
some time.

Andrew Hawkenen and family
were entertaining friends last Sunday.

Mrs. J.B. Shaver has returned from
Winnipeg after spending a week
with friends.

Bow Island News

From our own Correspondent

Mr. P. LaMarsh who has been on a
visit to his daughter Mrs. Schornert at
Kitchener B.C. returned last Friday
looking and feeling much better for
the change. Mr. and Mrs. Walter
Schornert have their home in a lovely
location where they can just go a few
yards from their door and catch all
the fish they require. From the creek,
they can also walk to a berry patch
and gather all they need, also Mr.
Schornert is doing well there, he can
get good wages.

During Mrs. LaMarsh's visit there
she encountered rather an unusual ex-
perience, after she had retired one
night she thought she heard some-
thing outside the window and who
should it be but Mr. Bear. It was
about to turn away after eating about
12 lbs. of beef and a quantity of
butter but the rifle was too sure a hit for
him so Mr. Bear fell.

Mr. Brooke from Calgary and Mr.
Burrell from Macleod were official
visitors here last week.

Mr. and Mrs. P. LaMarsh were
visitors to town last Monday.

Mr. Webb Smith west of Burdett
was a business visitor to Bow Island
last Tuesday.

Harvesters leave Ottawa for West

First Excursion Train
Carries more than One
Thousand Passengers

OTTAWA, August 8. — The first
harvesters excursion of this season
left Ottawa at one o'clock to day over
the C.P.R. It carried slightly more
than 1,000 passengers of whom 500
were Ottawa and district men. At
the C.P.R. officials said the men
going west to the harvest fields this
year were largely native born and
that the foreign element was not as
noticeable as in previous years.

C.P.R. officials stated that the re-
sponse to the call for men was better
than last year.

Several thousand harvesters also
left Toronto today on special trains
for Winnipeg.

Burdett News

From our own Correspondent
Now that the Farmer is using
Oil and Grease for his machinery
he should call on Fielding at Burdett.
He can sell you at the right price
and his quotations before buying.

Rumors have just come in of the
engagement of Leonard Kamp, south
west of town, to Miss Annie Wischers
of Monarch, Alta.

Just when the happy event will
take place is not yet known.

Mr. H.W. Fletcher has returned
last Saturday from 2 weeks holiday at
Banff.

Mrs. J. F. Hamilton is still in the
Hospital at Taber.

Miss Myrtle Brown returned last
Wednesday from the North where
she has been teaching school for the
last year.

Bert Hill has built two large header
boxes or barges in the Stacey Lumber
Yard, as he says he finds that the
high class Lumber he gets there is
easily the best; and the only kind he
wants.

Mr. Oldroyd after holding his
position as manager of the Pioneer
Lumber Co. for one week, said he got
fed up on it and has resigned.

Mr. Johnson the Branch Superin-
tendant of the Pioneer Lumber Co.
was looking after the local yard here
for a few days.

Sam Hazel is also taking out a lot
of Granary material.

Emery Proulx is also building a
number of new Granaries.

A.C. Schultz has also built an ad-
dition to his house and a number
of the new Granaries to hold his crop
this year.

The Contractors, Messrs. Cropley
and Lyons have been busy the last
week at N.H. Strom's, building a new
garage, and an up-to-date
chicken house and other outbuildings.

Fred Harvey is building a new
house, south of Burdett.

Mr. and Mrs. James Neill were
visitors to Burdett last Tuesday.

Two Headers were delivered to K.
Brown this week, Frank Kirk had
one.

Mr. V. Spackman of Stirling and
Miss Ethel Fall of Taber were united
in holy matrimony last Monday 8th.
August at the home of the bride at
Taber by Bishop A. Haynes.

The party left the same night on
their honeymoon for Salt Lake City
and various points.

On their return Mr. and Mrs. V.
Spackman will make their home in
Burdett, where Mr. Spackman will
take the position of Principal of
Burdett School.

A sumptuous Wedding dinner was
afterwards served to a very large
circle of relations and friends, over
sixty partaking of the Wedding Feast,
which broke up at 3 o'clock in the
morning.

The happy couple were recipients of
many valuable and handsome presents.
They left amidst a shower of
congratulations and loving wishes
for a very long and happy wedded
life.
